Discord Server Documentation — Personal Server Setup & Moderation Project

Server Invite: https://discord.gg/6Wjsx2FWs

Role: Server Owner

Period: 2025 – Present

1. Server Overview

This Discord server was independently created as a technical learning and practice environment.

The server's primary purpose is not community growth or engagement, but to gain hands-on experience with Discord infrastructure and moderation systems.

Learning Objectives

• Discord server setup and configuration

• Roles and permissions management

• Bot integration and configuration

• AutoMod and moderation system setup

The server functions as a sandbox environment for testing, experimentation, and skill development.

2. Purpose of the Server

The server was intentionally created without public onboarding in order to:

• Focus exclusively on technical setup and configuration

• Safely test permissions and moderation tools

• Experiment with bot behavior without impacting real users • Develop a deeper

  understanding of Discord's moderation systems

No public engagement or member growth strategies were implemented.

3. Role & Responsibilities

As the Server Owner, I was responsible for the complete technical design, setup, and configuration of the server.

Core Responsibilities

• Created the server structure from scratch

• Designed channel categories and layouts

• Configured roles and permission hierarchies

- Set up AutoMod rules and safety features

- Integrated and configured moderation and utility bots

- Tested moderation actions and automated responses

4. Server Setup & Configuration

Server Structure

- Logical channel categorization

- Clear separation between administrative, moderation, and member areas

- Dedicated test channels for bot and AutoMod behavior

Roles & Permissions

- Owner, administrator, and moderator roles

- Permission hierarchy designed to prevent misuse

- Controlled access to sensitive and staff-only channels
